

Mother & Baby Measures Hospitals with CY2017 Performance Data

Data represents Calendar Year 2018 performance for 213 of the hospitals listed in Mother & Baby section on the Cal Hospital Compare website for the following measures: cesarean birth rate, episiotomy rate, VBAC rate, VBAC routinely available, and deliveries by certified nurse midwife. These hospitals submitted data to the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center to enable rapid-cycle reporting and quality improvement. 22 of the hospitals listed in this section did not submit data to the CMQCC Maternal Data Center; their results represent 2017 data available from the Office of Statewide Health Planning and Development. The hospitals that did *not* report 2018 performance data to CMQCC are listed below:
