

Mother & Baby Measures Hospitals with Lagged Performance Data

For most of the hospitals listed in the Mother & Baby section on the Cal Hospital Compare website, the results represent **July 2020 – June 2021 performance** for the following measures: cesarean birth rate, episiotomy rate, VBAC rate, VBAC routinely available, and deliveries by certified nurse midwife. These hospitals submitted data to the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center to enable rapid cycle reporting and quality improvement.

However, hospitals listed in the Mother & Baby section did not submit data to the CMQCC Maternal Data Center; their results represent **Calendar Year 2019** data available from the California Department of Health Care Access and Information (HCAI). The hospitals with lagged performance data are:

- Adventist Health Tulare
- Beverly Hospital
- Adventist Health Delano
- Emanate Health Queen of the Valley Hospital
- Lompoc Valley Medical Center
- Los Robles Regional Hospital & Medical Center
- Mammoth Hospital
- Methodist Hospital of Southern California
- Oroville Hospital
- Palo Verde Hospital
- Pioneers Memorial Healthcare District
- San Dimas Community Hospital
- St. Rose Hospital
