

Mother & Baby Measures Hospitals with Lagged Performance Data

For most of the hospitals listed in the Mother & Baby section on the Cal Hospital Compare website, the results represent **January through December 2024 performance** for 199 hospitals for the following measures: NTSV cesarean birth rate, episiotomy rate, VBAC rate, VBAC routinely available, and deliveries by certified nurse midwife. These hospitals submitted data to the California Maternal Quality Care Collaborative (CMQCC) Maternal Data Center cycle reporting and quality improvement.

However, one hospital listed in the Mother & Baby section did not report data to CMQCC for the full reporting period and nine other hospitals have now closed their maternity services. These hospitals are:

	CY 2022 Reported - HCAI Data
Oroville Hospital	
Adventist Health Simi Valley	Closed maternity services
Adventist Health Tulare	Closed maternity services
Scripps Mercy-Chula Vista	Closed maternity services
Montclair Hospital Medical Center	Closed maternity services
